User Manual

Thank You for Choosing the Mycena Lamp

The Mycena Lamp has been designed to provide a cozy and magical light for children's rooms. Inspired by the bioluminescence of Mycena mushrooms, its luminous screen continues to glow softly after the light is turned off, offering gentle companionship in the dark. This manual will help you understand its operation and keep it in perfect condition.

Instructions for Use

Turning On: Connect the Mycena Lamp to a power outlet using the supplied cable.

Turning Off: To turn it off, press the button located on the power cord. The luminous screen will continue to glow softly for a few minutes, providing a gentle light ideal for falling asleep.

Recharging Luminosity: The lamp's screen needs exposure to light to recharge its luminescent effect. Place it near a light source during the day so it can softly glow when the lamp is turned off at night. The lamp's own light also charges the luminescent material.

Safety Instructions

Supervised Use: The Mycena Lamp is designed for decorative purposes and should not be used as a primary lighting source.

Dry Environments: Keep the lamp in dry environments and avoid contact with water or humidity to ensure durability.

Child Supervision: Although the lamp is safe for children's rooms, supervision is recommended for young children.

Storage: Do not expose the lamp to extreme temperatures or direct sunlight for long periods, as it may deform.

Care and Maintenance

Cleaning: Wipe the Mycena Lamp with a dry or slightly damp cloth. Avoid using abrasive cleaners or liquids that could damage the PLA finish.

Maintaining Luminosity: To ensure the screen retains its glow-in-the-dark capability, avoid prolonged contact with dirty or greasy surfaces.

Technical Specifications

Input Voltage: DC 5V

Power: 2W

Dimensions: 18 cm height x 17 cm width

Weight: 250 g

Material: PLA of biological origin, safe and sustainable

Warranty: 2 years from the date of delivery

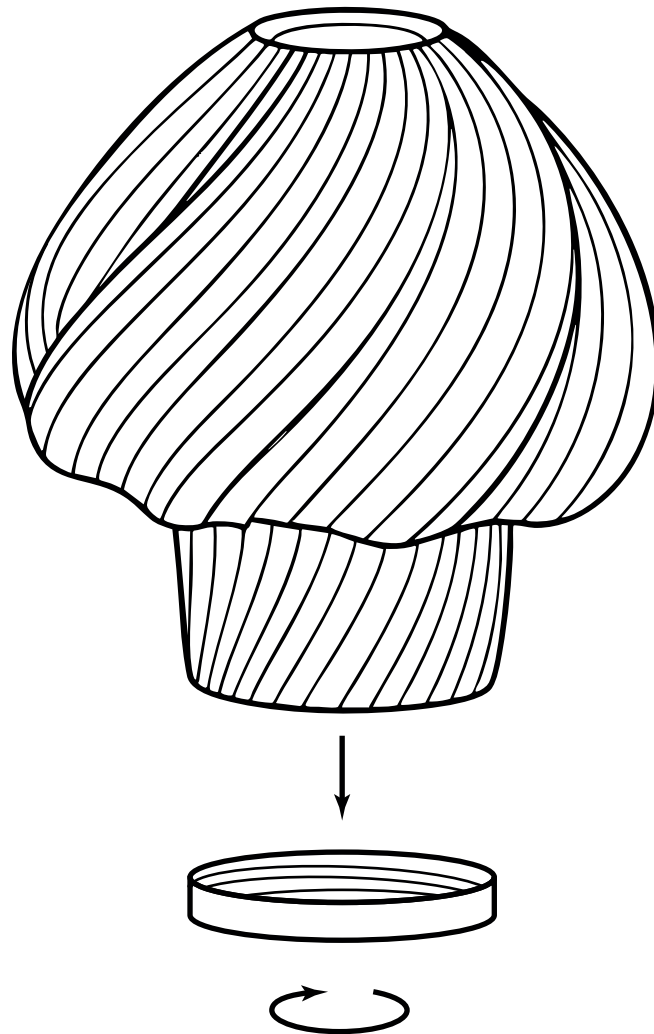

Warranty

The Mycena Lamp includes a 2-year warranty from the date of delivery, covering manufacturing defects and material issues.

This warranty does not cover damages caused by misuse, drops, or exposure to unsuitable conditions.

Assembly

You will receive the lamp fully assembled and ready to use. If in the future it is necessary to replace the LED lighting due to a malfunction, you can easily do so by unscrewing the base where it is located.

Contact and Technical Support

For any additional questions or technical support, please contact our customer service team. We are here to assist you and ensure you enjoy your Mycena lamp.
